Issues Found

[CRITICAL] GET /ready — 404 Not Found

The /ready endpoint is documented but returns 404. The server does not expose this route.

[BUG] PATCH /api/v1/tools/{id}/ — 500 Internal Server Error

DB check constraint 'agent_tools_name_check' is violated on partial update even without modifying the name field. The backend likely sends an empty/null name in the UPDATE query.

[BUG] PATCH /api/v1/widget-settings/{id}/ — 500 Internal Server Error

Partial PATCH sends an empty string for the enum field 'bot_position', causing: 'invalid input value for enum bot_position'. Partial updates should only include changed fields.

[BUG] POST /api/v1/widget-settings/ with theme — 400 Bad Request

The 'theme' field rejects string values like 'light'. The proto deserialization expects a numeric enum but docs show a string. Values need clarification.

[NOT FOUND] GET /api/v1/ghl/oauth/authorize — 404

OAuth authorize route not found on the server. GHL OAuth flow cannot be initiated.

[NOT FOUND] GET /api/v1/calcom/oauth/connect — 404

OAuth connect route not found on the server. Cal.com OAuth flow cannot be initiated.

[AUTH] GHL Endpoints (setup/status, appointments, calendars, disconnect)

These endpoints return 401 and appear to require session-based auth rather than the X-API-Key header. Docs should clarify this.

[BUG] POST /api/v1/calcom/disconnect — 500

Returns internal server error when Cal.com is not connected. Should return a proper 400 with a message instead.

Detailed Test Results

Health

GET	✓ 200	/health	Returns 'healthy' string
GET	✗ 404	/ready	Endpoint not found on server

Agents

GET	✓ 200	/api/v1/agents/	Returns empty list (no agents)
GET	✓ 200	/api/v1/agents/?limit=10&offset;=0	Pagination works
GET	✗ 400	/api/v1/agents/{id}/	Returns UUID validation error for invalid ID (expected)
POST	✓ 200	/api/v1/agents/	Agent created successfully
PATCH	✓ 200	/api/v1/agents/{id}/	Agent name & temperature updated
PATCH	✓ 200	/api/v1/agents/{id}/status/	Status set to AGENT_STATUS_INACTIVE
DELETE	✓ 200	/api/v1/agents/{id}/	Agent deleted, returns {}

Agent Tools

GET	✓ 200	/api/v1/tools/	Returns empty list (no tools)
GET	✗ 400	/api/v1/tools/{id}/	UUID validation error for invalid ID (expected)
POST	✓ 200	/api/v1/tools/	Tool created successfully
GET	✓ 200	/api/v1/tools/{id}/ (valid)	Tool fetched by valid UUID
PATCH	✗ 500	/api/v1/tools/{id}/	DB check constraint 'agent_tools_name_check' violated — server bug
DELETE	✓ 200	/api/v1/tools/{id}/	Tool deleted, returns {}

Widget Settings

GET	✓ 200	/api/v1/widget-settings/	Returns empty list
GET	✗ 400	/api/v1/widget-settings/{id}/	UUID validation error for invalid ID (expected)
POST	✗ 400	/api/v1/widget-settings/ (with theme)	Proto syntax error: 'theme' field rejects string enum value
POST	✓ 200	/api/v1/widget-settings/ (no theme)	Widget settings created successfully
GET	✓ 200	/api/v1/widget-settings/{id}/ (valid)	Widget settings fetched by valid UUID
PATCH	✗ 500	/api/v1/widget-settings/{id}/	DB error: invalid input for enum 'bot_position' when partial update sent
DELETE	✓ 200	/api/v1/widget-settings/{id}/	Widget deactivated, returns {}

Telephony

GET	✓ 200	/api/v1/phone-numbers/available-numbers/US /	3 US numbers returned with pricing
GET	✓ 200	/api/v1/phone-numbers/available-numbers/GB /	2 GB numbers returned with pricing
GET	✓ 200	/api/v1/phone-numbers/list	Returns empty list (none purchased)

GET	✓ 200	/api/v1/phone-numbers/twilio-owned-numbers /	Returns empty list
POST	SKIPPED	/api/v1/phone-numbers/buy/	Not tested — would incur real charges
DELETE	SKIPPED	/api/v1/phone-numbers/{phone}/release/	Not tested — requires purchased number
POST	SKIPPED	/api/v1/phone-numbers/import/	Not tested — requires valid SIP config
POST	SKIPPED	/api/v1/phone-numbers/create/telephony/	Not tested — requires valid credentials

Appointments

POST	✗ 400	/api/v1/ghl/appointments/manage	Invalid request body — needs connected GHL integration
POST	✗ 400	/api/v1/calcom/appointments/manage	Invalid request body — needs connected Cal.com integration

GHL Integration

GET	✗ 404	/api/v1/ghl/oauth/authorize	Route not found on server
GET	SKIPPED	/api/v1/ghl/oauth/callback	Not tested — browser-only redirect
GET	✗ 401	/api/v1/ghl/setup/status	Requires GHL session auth (not API key)
GET	✗ 401	/api/v1/ghl/appointments	Requires GHL session auth (not API key)
GET	SKIPPED	/api/v1/ghl/appointments/{id}	Not tested — requires valid appointment ID
GET	✗ 401	/api/v1/ghl/setup/calendars	Requires GHL session auth (not API key)
GET	SKIPPED	/api/v1/ghl/setup/agents/calendar/{id}	Not tested — requires GHL auth
POST	✗ 401	/api/v1/ghl/disconnect	Requires GHL session auth (not API key)

Cal.com Integration

GET	✗ 404	/api/v1/calcom/oauth/connect	Route not found on server
GET	SKIPPED	/api/v1/calcom/oauth/callback	Not tested — browser-only redirect
GET	✓ 200	/api/v1/calcom/status	Returns not_connected status (needs org_id param)
GET	✗ 400	/api/v1/calcom/event-types	Cal.com not connected (expected if not set up)
GET	SKIPPED	/api/v1/calcom/event-types/lookup/{id}	Not tested — requires connected Cal.com
GET	✗ 400	/api/v1/calcom/appointments	Cal.com not connected (expected if not set up)
POST	✗ 500	/api/v1/calcom/disconnect	Internal server error when Cal.com not connected
